**About Diamond Blackfan Anemia:**

DBA is a rare blood condition, characterized by a failure of the bone marrow to produce red blood cells. The majority of individuals are diagnosed before their first birthday. Due to its rarity, research for DBA gets an extremely small amount of government funding. The majority of funds come from families of individuals afflicted with the disease and from events, such as this one, that help raise money to find a cure for this life-threatening illness. To learn more about DBA, visit [www.dbafoundation.org](http://www.dbafoundation.org)
